

Journey Narrative Architecture Report

Internal report generated 2026-06-05. This PDF wraps the response summary and screenshots for the eight-section Journey narrative pass.

What Changed

Eight-section Journey

Replaced the six-section map with a fuller day structure from Before Morning to New Dawn.

Late-day split

Split the old broad Wider AI Literacy ending into Twilight, Midnight Ledger, and New Dawn.

Clickable stages

Made Journey stage items real buttons that scroll inside the app shell.

Glossary grouping

Updated Learning path glossary grouping to the new section names.

No new lessons were added. The existing 38 cards were reassigned and reordered so Journey, Learn mode, and Next Lesson all follow the same narrative arc.

Files Changed

- `src/data/content.ts`
- `src/main.tsx`
- `src/styles/global.css`
- `README.md`
- `docs/REVIEW_NOTES.md`
- `docs/curriculum/JOURNEY_SECTION_RESTRUCTURE_V0_15.md`
- `docs/curriculum/V0_15_CHANGE_LOG.md`
- `docs/curriculum/prompt-life-v0-15-journey-narrative-report.html`
- `docs/curriculum/prompt-life-v0-15-journey-narrative-report.pdf`
- `docs/screenshots/v0-15-*.png`

How To Run Locally

```
cd ~/Desktop/promptlife
npm install
npm run dev
```

Open the local URL printed by Vite. For phone testing on the same Wi-Fi network, run `npm run dev -- --host 0.0.0.0` and open the Network URL Vite prints.

For the deployed build, open <https://kevinhegg.github.io/promptlife/?v=015> after the GitHub Pages run completes.

New Section Structure

#	Section	Role
1	Before Morning	Model shaping before ordinary use.
2	Morning Commute	Text becomes tokens, IDs, vectors, and tensors.
3	Workday	Transformer layers process the current context.
4	Decision Room	Scores become probabilities and one next token is chosen.
5	The Day Repeats	Responses grow; context changes and expires.
6	Twilight: The Wider Landscape	Other AI systems and why LLMs arrived now.
7	Midnight Ledger	Costs, extraction, risk, and institutional shadows.
8	New Dawn	Benefits, human-centered use, responsible choices, prompting, and synthesis.

Card Reassignment Summary

- **Twilight:** How AI Learns, Diffusion vs Autoregression, Multimodal AI, The Perfect Storm.
- **Midnight Ledger:** Collective Intelligence, Extracted; Costs We Must Count; Risk vs Myth.
- **New Dawn:** Benefits Worth Taking Seriously; Human-Centered AI; Better AI Is a Choice; Effective Prompting from Model Literacy; Model Literate Synthesis.

Behavior

- Stage links scroll to visible Journey sections and respect reduced-motion settings.
- Journey filters keep All, Essential, Deep, and Ethics. Empty sections are hidden under filters.

- Glossary Learning path now groups terms by the eight-section architecture.
- Preview/Review/Learn behavior remains unchanged. Preview from New Dawn returned near the New Dawn section during QA.

Verification

- `npm install` : passed.
- `npm run typecheck` : passed.
- `npm run build` : passed with the existing Vite large-chunk warning.
- `npm run build:pages` : passed with the existing Vite large-chunk warning.
- Browser QA at 320, 390, and 430px found no horizontal overflow in Journey All, Essential, Deep, or Ethics filters.
- Browser QA verified section jumps, Glossary Learning path grouping, Ethics filter stage hiding, and Preview/Return behavior.

Known Issues

- The existing Vite single-chunk warning remains.
- Reset-progress QA was not clicked because it clears local device progress and requires explicit confirmation.
- Prompt Injection / Tool Risk remains inside Risk vs Myth rather than a dedicated card.

Next Three Recommended Steps

1. Run the source-review pass for Midnight Ledger and New Dawn before v1 publication language.
2. Consider a dedicated Prompt Injection / Tool Risk card if security literacy needs more space.
3. Add separate Badge progress for Essential, Deep, and Ethics once the path model stabilizes.

Screenshots

MAIN PATH

Today in Prompt Life

Follow one prompt from before training through inference, generation, and model literacy.

Jump to a stage of the prompt's day.

PATH VIEW

Choose a path

All cards follow the full day. Essential is the shortest path. Deep adds mechanics. Ethics follows costs, choices, and human consequences.

All

Essential

Deep

Ethics

Showing all 38 Journey cards across 8 stages.

Glossary

Badge

Journey top: eight stage links over two rows at 390px.

6 Twilight: The Wider Landscape

The day widens into other AI systems and why LLMs arrived now.

The prompt's day opens onto the larger AI landscape.

FOCUS

How LLMs fit into the larger AI landscape.

KEEP CLEAR

Not all generative AI works the same way.

How AI Learns

Durable learning versus temporary steering

27

Essential

Preview

Diffusion vs Autoregression

Denoising is a different generation pattern

28

Deep

Preview

Multimodal AI

Multiple media types together

29

Glossary

Badge

Twilight: The Wider Landscape introduces other AI systems and why LLMs arrived now.

7 Midnight Ledger

Count the costs, shadows, and debts honestly.

The instant answer is weighed against data, labor, infrastructure, privacy, and power.

FOCUS

What costs and debts must be counted.

KEEP CLEAR

The answer feels weightless; the infrastructure is not.

Collective Intelligence, Extracted

31

No creators, no model

Ethics

Preview

Costs We Must Count

32

The answer feels weightless.
The infrastructure is not.

Ethics

Preview

Risk vs Myth

33

Practical institutional literacy

Essential

Glossary

Badge

Midnight Ledger counts costs and risks without doom language.

8 New Dawn

Use model literacy to choose better human-centered futures.

The next day begins with more careful human choices about use, design, and responsibility.

FOCUS

How humans choose better uses.

KEEP CLEAR

Fluency is not wisdom; humans remain responsible.

Benefits Worth Taking Seriously

34

Real help, not utopian hype

Ethics

Preview

Human-Centered AI

35

Tools should serve human dignity

Ethics

Preview

Better AI Is a Choice

36

Design, policy, and incentives matter

Ethics

All cards follow the full day. Essential is the shortest path. Deep adds mechanics. Ethics follows costs, choices, and human consequences.

All

Essential

Deep

Ethics

Showing 6 Ethics cards across 3 stages.

GUIDED COMPARISONS
Run and compare

Use these when the map feels abstract: one guides a prompt through the model, the other compares how AI systems learn.

Prompt Run

How AI Learns

6

Twilight: The Wider Landscape

The day widens into other AI systems and why LLMs arrived now.

The prompt's day opens onto the larger AI

DEFINITIONS PLUS RELATIONSHIPS

Glossary

Use each term with its neighbor. That is where the mental model gets stable.

Search terms

token, tensor, softmax...

A-Z

Learning path

Learning path shows how the vocabulary builds from prompt to response.

BEFORE MORNING

LLM

A large language model is a learned system that turns current context into probabilities for the next token.

An LLM uses weights shaped by training, then uses inference to generate response tokens one at a time.

Introduced in: What Is an LLM?

Rationalism

A reason-first tradition that emphasizes explicit principles, rules, and logic.

Home

Journey

Play

Glossary

Badge

Glossary Learning path remains grouped and readable.

AI training and inference rely on data-center infrastructure, which can affect energy, water, siting, and hardware demand.

Introduced in: The Perfect Storm

MIDNIGHT LEDGER

Collective intelligence

The shared human knowledge, language, art, code, research, documentation, and culture that leave patterns models can learn from.

Generative AI depends on traces of collective human expression, though the model is not humanity's mind.

Introduced in: Collective Intelligence, Extracted

Data provenance

Information about where data came from, how it was collected, and what rights or limits apply to its use.

Provenance helps people judge whether training, retrieval, or evaluation data was gathered responsibly.

Introduced in: Collective Intelligence, Extracted

Consent

Permission from people or creators for a specific use of their data or work.

Consent questions matter when human expression becomes training data, retrieval content, or
