

PROMPT LIFE V0.6.1 - JUNE 2, 2026

Bottom Navbar Transparency and Blur Clip

Updated the mobile bottom navigation so it is slightly more transparent and no longer lets the blur fog the content area above the nav.

What Changed

- Bumped the app version from `0.6.0` to `0.6.1`.
- Reduced the bottom nav panel opacity to `rgba(255, 255, 255, 0.82)`.
- Shortened and clipped the nav backdrop layer with `overflow: hidden`.
- Moved the blur surface lower with a masked pseudo-element so the top edge stays clear.
- Extended the blur surface downward below the viewport with a negative bottom offset.

Verification

`npm run typecheck` : passed.

`npm run build` : passed.

Browser CSS metrics confirmed the nav background, lower blur start, and offscreen downward extension.

CHECKPOINT

Which description is most accurate?

- A** A learned prediction system
- B** A conscious reader
- C** A hand-written rulebook

REFLECT

Teach it back in one sentence.

Example: Inference uses the model's weights but does not rewrite them.
