

PROMPT LIFE V0.18.5

Home Pillar Chip Alignment

Aligned the three Home pillar pills so their icons use the same left inset and the long label stays inside its pill.

What Changed

- Wrapped each pillar label in `.pillar-chip-label` for predictable sizing.
- Changed the Home pillar chips to a two-column grid: fixed icon lane plus flexible label lane.
- Let the Home pillar row adapt from two columns at 390px to stacked full-width chips at 320px.
- Bumped the visible app version to `v0.18.5`.
- No Home copy, generated assets, Journey cards, progress logic, badge logic, checkpoint behavior, or dependencies changed.

Files Changed

- `src/main.tsx`
- `src/styles/global.css`
- `docs/REVIEW_NOTES.md`
- `docs/home/screenshots/home-v0-18-5-pill-layout-390.png`
- `docs/home/screenshots/home-v0-18-5-pill-layout-320.png`

Verification

typecheck passed**build passed****build:pages passed****browser QA passed**

- `npm run typecheck`: passed.
- `npm run build`: passed with the existing Vite large-chunk warning.
- `npm run build:pages`: passed with the existing Vite large-chunk warning.
- Browser QA: at 390px and 320px, every icon measured 10.9px from its pill left edge.
- The Relationships label did not overflow its pill, no horizontal overflow appeared, and no console errors were reported.
