

PROMPT LIFE V0.12

Wider AI Literacy Implementation + UX Repair

Internal report generated 2026-06-04. This PDF wraps the response summary and screenshots for the v0.12 implementation pass.

What Changed

Journey cards

Added eight Wider AI Literacy draft cards and one final synthesis card position.

Modes

Added Learn, Preview, and Review behavior with progress-safe Return to Journey actions.

Visuals

Added eight coded SVG/HTML placeholder visual aids; no generated PNG assets.

Readability

Improved key contrast issues and added reusable text-surface utility classes.

Preview and Review modes do not update lesson completion, reflection progress, or badge progress. Learn mode keeps the normal checkpoint-gated Next lesson behavior.

Files Changed

- `src/main.tsx`
- `src/data/content.ts`
- `src/components/VisualAids.tsx`
- `src/styles/global.css`
- `docs/curriculum/WIDER_AI_IMPLEMENTATION_REPORT_V0_12.md`
- `docs/curriculum/WIDER_AI_SOURCE_NEEDS_V0_12.md`
- `docs/design/GENERATED_VISUAL_ASSET_PLAN_V0_11.md`
- `docs/REVIEW_NOTES.md`
- `docs/screenshots/v0-12-*.png`

New Journey Cards

1. The Perfect Storm
2. Collective Intelligence, Extracted
3. Benefits Worth Taking Seriously
4. Costs We Must Count
5. Human-Centered AI
6. Better AI Is a Choice
7. Effective Prompting from Model Literacy
8. Model Literate Synthesis

RAG and Retrieval remains a dedicated Journey card. Grounding and Hallucinations remain glossary/RAG concepts for now; a future pass should decide whether each deserves a dedicated Journey card.

Verification

- `npm install` : passed before implementation.
- `npm run typecheck` : passed before and after implementation.
- `npm run build` : passed before and after implementation.
- Browser QA verified Preview, Review, Learn completion, Next Lesson, Return to Journey, focus, and top-scroll behavior.
- Known build note: Vite reports a single app chunk over 500 kB after minification. No heavy dependency was added.

What Is an LLM?

A learned next-token prediction system

A large language model is a learned system that turns current context into probabilities for the next token.

The Perfect Storm

Why LLMs arrived now

Modern LLMs became possible when human-created digital data, powerful compute and storage, deep-learning methods, human labor, and economic incentives converged.

Costs We Must Count

The answer feels weightless. The infrastructure is not.

Generative AI has physical, social, cultural, and ethical costs that must be counted honestly.

8/12

The screenshot displays a mobile application interface for 'WIDER AI LITERACY'. At the top, a progress bar shows '33 / 36' and a sequence of six steps: 1. Before Morning, 2. Morning Commute, 3. Workday, 4. Decision Room, 5. The Day Repeats, and 6. Wider AI Literacy (the current step, highlighted in green). The main title is 'Better AI Is a Choice' in large blue font, followed by the subtitle 'Design, policy, and incentives matter'. Below this, two light blue boxes contain text: 'AI costs and benefits are shaped by technical design, deployment choices, governance, incentives, and institutional decisions.' and 'Previewing this card. Progress will not change.' A collection of ten white buttons with blue text is arranged in a grid: 'Responsible AI', 'Model distillation', 'Efficient inference', 'Data provenance', 'Consent', 'Compensation', 'Human review', 'Governance', and 'RAG'. At the bottom, a navigation bar features five icons: 'Home', 'Journey' (selected), 'Play', 'Glossary', and 'Badge'.

PERFECT-STORM

Storm Front

Lesson: The Perfect Storm

Pattern: perfectStorm

Variant: zen-garden-map

Storm Front

Why LLMs arrived now

Data, compute, methods, labor, and incentives converged into modern LLM capability.

- 1 **Data** Human-created text, media, code, and documents supplied patterns.
- 2 **Compute** Hardware, storage, and data centers made large-scale training possible.
- 3 **Methods** Deep learning and transformer advances shaped the architecture.
- 4 **Labor and incentives** Human evaluation work and market incentives pushed systems into products.

Key takeaway:

Modern LLMs came from a convergence, not a single spark.

LEARNING OBJECTIVE

Internal Visual Aid Gallery view for the new Storm Front coded visual.

Known Issues

- Wider AI cards are draft curriculum copy and need source review before citation-heavy publication.
- Generated PNG assets remain deferred by design.
- Older concept animation panels are readable but should later migrate to the v0.10 visual identity style.
- Grounding and Hallucinations may deserve dedicated Journey cards in a future curriculum architecture pass.

Next Three v0.13 Steps

1. Source-review the Wider AI claims and add scoped citations where needed.
2. Decide whether Grounding and Hallucinations become dedicated Journey cards.
3. Refine the eight new coded visual aids after iPhone review.
