

PROMPT LIFE V0.18.4

Home Generated Asset Integration

Integrated the provided textless Home hero and app mark while preserving the current Home copy and app logic.

What Changed

- Home hero now uses `public/assets/generated/home/home-hero-prompt-cloud.png`.
- Home logo mark, favicon, Apple touch icon, and manifest icon now use `public/assets/generated/home/promptlife-mark.png`.
- The previous Home logo and hero art remain as image-load fallbacks in app code.
- Home text remains in HTML: Prompt Life and Demystifying LLMs in the AI era through clear explanations, useful metaphors, and a little play.
- Bumped the visible app version to v0.18.4.

Files Changed

- `src/main.tsx`
- `src/styles/global.css`
- `src/data/visualAssets.ts`
- `index.html`
- `public/manifest.webmanifest`
- `public/assets/generated/home/home-hero-prompt-cloud.png`
- `public/assets/generated/home/promptlife-mark.png`
- `docs/REVIEW_NOTES.md`
- `docs/home/screenshots/home-v0-18-4-generated-assets-390.png`
- `docs/home/screenshots/home-v0-18-4-generated-assets-320.png`

Verification

typecheck passed**build passed****build:pages passed****browser QA passed**

- `npm run typecheck`: passed.
- `npm run build`: passed with the existing Vite large-chunk warning.
- `npm run build:pages`: passed with the existing Vite large-chunk warning.
- Browser QA: 390px and 320px confirmed the generated Home assets loaded, no horizontal overflow appeared, no console errors were reported, and the standalone Home subhead stayed absent.
- GitHub Pages readiness: the Pages build copied both PNGs into `dist/assets/generated/home/`.

Known Issues

- The existing Vite large-chunk warning remains. It did not block the build.
