

Prompt Life v0.28.11 Small Human Test Release Candidate

Generated: 2026-06-15T18:47:22.919Z

Ready for small human testing

Prompt Life is under development. The single badge remains under construction, pending human review, and not issued.

Summary

- Final learner-facing label cleanup changed Tiny interaction to Try interaction.
- Human-test packet and short feedback-form copy were created for colleague, friend, and family testing.
- Release-candidate QA captured core learner screens at 390px.
- No new features, checkpoint rewrites, Play changes, or Badge model changes were added.

Current App Status

- Journey: 39 cards active.
- Checkpoints: active and randomized by identity.
- Visuals: 12 Image 2 concept-card manifest entries live; coded mechanism visuals remain where exact mechanics matter.
- Exercises: 39 Journey Try Interactions inventoried in v0.28.10; P0 and P1 count is zero.
- Play, Glossary, and Badge remain available for smoke testing.

Ready For Small Human Testing

- Learner copy has passed leak, language, word-wrap, and visual audits.
- Human testers can now try a short slice: Journey cards, checkpoints, Try Interactions, Glossary, Play, and Badge page glance.
- Wrong-answer checkpoint feedback remains instructive without revealing the correct answer directly.

Not Final

- The badge is not issued.
- The Badge page is still under construction and pending human review.
- Human testing should decide whether the P2 watch interactions need simplification.

Known Watch Items

- What Is an LLM?
- Vectors
- Tensors
- Sampling
- Collective Intelligence, Extracted
- Benefits Worth Taking Seriously
- Model Literate Synthesis

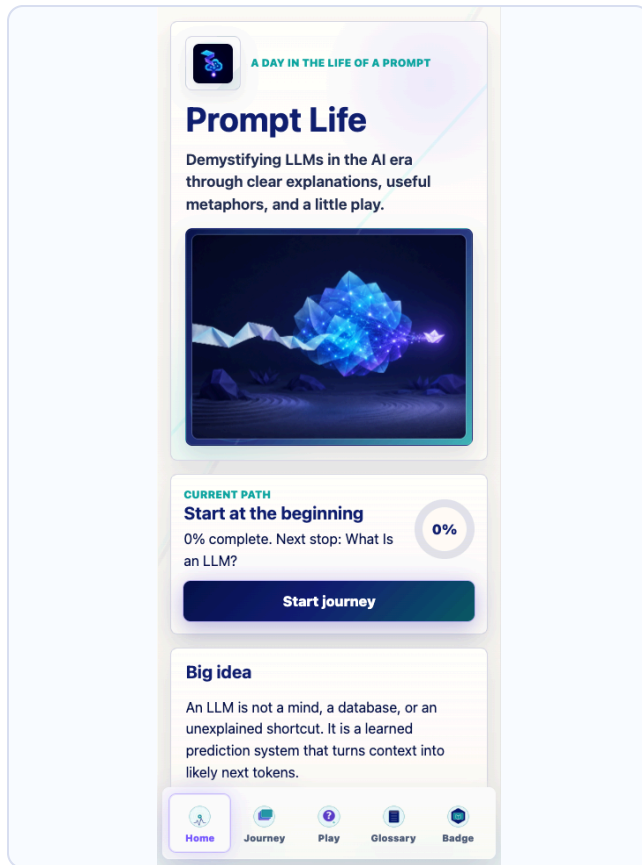

Audit Results

Command	Status
npm run typecheck	pass
npm run build	pass
npm run build:pages	pass
npm run audit:answers	pass
npm run audit:checkpoints	pass
npm run audit:question-clues	pass
npm run audit:learner-copy	pass
npm run audit:learner-leaks	pass
npm run audit:language	pass
npm run audit:visual-assets	pass
npm run audit:visual-aids	pass
npm run audit:visual-overflow	pass
npm run audit:word-wrap	pass
npm run audit:exercises	pass
npm audit --audit-level=high	pass

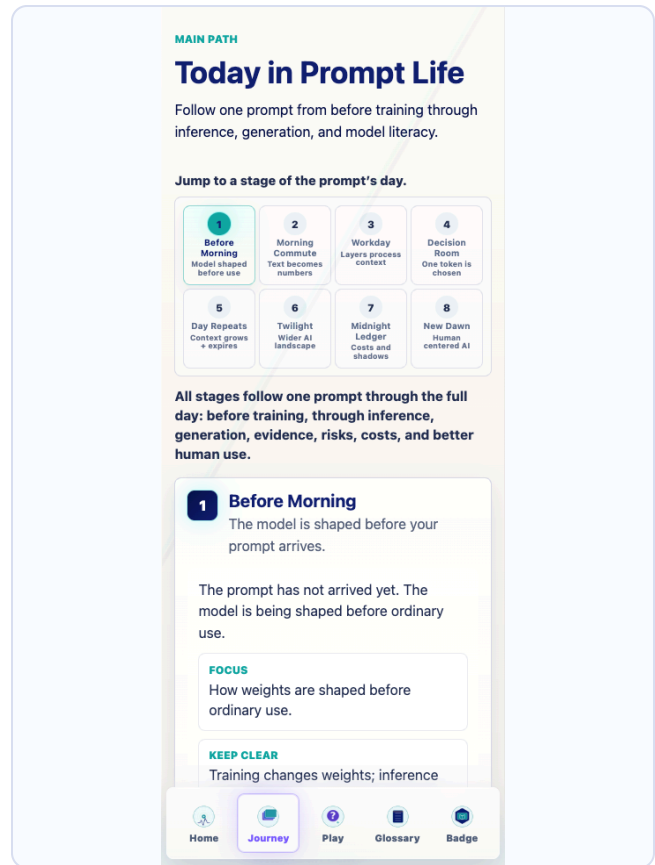

Manual QA Results

Check	Status	Detail
stage navigation links	pass	8 stage buttons; horizontal overflow 0px.
checkpoint wrong-answer no-reveal	pass	Wrong choice showed targeted feedback and did not reveal the correct answer.
checkpoint multi-question sequence	pass	Before: 1 of 2 questions; after: 2 of 2 questions.
badge status language	pass	Badge page checked for under construction, pending human review, and not issued language.
rendered process-language scan	pass	No Tiny Interaction, magic, debug notes, placeholder asset text, or process-language leaks in captured learner screens.
390px overflow and bottom nav	pass	No horizontal overflow or bottom-nav coverage found in captured 390px screens.

CHECKPOINT

1 of 2 questions

When an LLM answers a prompt by generating one token at a time, what is the model doing at each step?

- A** It reads with conscious understanding, then writes the whole answer at once.
- B** It changes its weights each time the user sends a new prompt.
- C** It searches a hidden database and copies the best matching passage.
- D** It scores next tokens from context, appends one, and repeats.

Not quite. That gives the model too much mind. Fluent behavior can happen without awareness. Try another choice.

Checkpoint wrong-answer no-reveal at 390px

CHECKPOINT

2 of 2 questions

[Previous question](#)**Final question**

An LLM gives a fluent explanation of a poem. What should a model-literate learner conclude?

- A** It must have found a hidden perfect source and copied the interpretation.
- B** It generated tokens from context and learned patterns; fluency is not awareness.
- C** The poem prompt permanently taught the base model a new skill.
- D** It must have inner awareness because the explanation sounds human.

DEFINITIONS PLUS RELATIONSHIPS

Glossary

Use each term with its neighbor. That is where the mental model gets stable.

PRACTICE MODE

Glossary Dojo

Practice twelve terms through definitions, relationships, and common mix-ups.

Practice 12 terms

Search terms

token, tensor, softmax...

A-Z**Learning path**

Find terms alphabetically.

Accessibility

Designing tools and materials so more people can perceive, understand, navigate, and participate.

AI can support accessibility through drafting, summarization, translation, captioning, alternate formats, and assistive workflows when reviewed carefully.

Accountability

Clear responsibility for decisions, harms, corrections, and oversight around an AI

Glossary at 390px

PLAY LAB

Play to learn

Short, calm challenges that make model mechanics visible.

Progress saved on this device. 0 of 5 practice challenges show saved completion or review progress.

Each challenge practices one model-literacy move.

[More below](#)

Play challenges

Suggested order follows the Journey.

Glossary Dojo

Ready

Practice concept discrimination.

Practice move: Name concepts

Recommended: Anytime

Anytime **Glossary**

Learning cards: All learning cards

Action: Choose, compare, review.

Time: 4 min

Played: 0

Progress: Not started

BADGE

Prompt Life: Model Literate

Under construction while the evidence model is reviewed.

Under construction

Pending human review

Prompt Life: Model Literate is under construction. The Journey, checkpoint questions, and evidence model are being tested before any badge is issued.

Your progress below is practice evidence, not an issued credential.
