

PROMPT LIFE · V0.27.15

Checkpoint Clue Repair, Visual Aid Audit, And Live Stage Navigation

This pass preserves the one-badge model, keeps all 39 Journey cards and 136 checkpoint questions active, fixes the clearest answer-giveaway checkpoint, audits rendered visual aids, and makes the lesson-header stage map live and accessible.

Fine-Tuning Before / After

Old stem: A team wants a support assistant to follow corporate norms across future conversations. Which move is closest to fine-tuning?

Old correct: Fine-tune weights or adapters for future responses.

New stem: A team wants a support assistant to follow corporate norms across future conversations. Which intervention would create a durable model-side change?

1. **A.** Sample from a lower-temperature distribution.
Not quite. Temperature changes how the next token is sampled during generation; it does not train future behavior.
2. **B.** Retrieve a policy page into the current context.
Close, but retrieved material helps only when it enters the current context. It does not by itself adapt the model for later conversations.
3. **C.** Run additional training or adapter training on relevant examples so future responses carry the pattern. **Correct**
Good distinction. This is the durable training-style move: future runs can carry the pattern, rather than only the current prompt or context.
4. **D.** Paste the norms into one user prompt.
A prompt can steer one current run, but it does not usually create a durable model-side change.

Other Checkpoint Copy Change

Sampling: Why can sampling make two runs with the same prompt produce different wording?

New correct answer: The decoder can choose among likely tokens instead of following one fixed path.

Answer-Giveaway Audit

2 questions changed and 36 candidates retained. Retained items use necessary mechanism vocabulary or have parallel nearby distractors.

Card	Question ID	Trigger	Status	Reason
Where LLMs Fit	v0279-where-llms-fit-q1	denoising	retained	Retained because the term is necessary for a fair mechanism or boundary distinction, or distractors use the same nearby vocabulary.
Rationalists vs Empiricists	v0279-history-q2	loss	retained	Retained because the term is necessary for a fair mechanism or boundary distinction, or distractors use the same nearby vocabulary.
Training	v0279-training-q1	training	retained	Retained because the term is necessary for a fair mechanism or boundary distinction, or distractors use the same nearby vocabulary.
Training	v0279-training-q3	training; inference	retained	Retained because the term is necessary for a fair mechanism or boundary distinction, or distractors use the same nearby vocabulary.
Fine-Tuning	v02712-fine-tuning-q1	fine tuning; fine tune; fine tuned	changed	Correct answer or stem was revised to reduce term echo.
Alignment	v02710-alignment-q2	alignment	retained	Retained because the term is necessary for a fair mechanism or boundary distinction, or distractors use the same nearby vocabulary.
Prompt vs Response	v02710-prompt-response-q1	prompt; response tokens	retained	Retained because the term is necessary for a fair mechanism or boundary distinction, or distractors use the same nearby vocabulary.
Prompt vs Response	v02710-prompt-response-q3	response	retained	Retained because the term is necessary for a fair mechanism or boundary distinction, or distractors use the same nearby vocabulary.
Tokenization	v02710-tokens-q2	text; tokens; embeddings	retained	Retained because the term is necessary for a fair mechanism or

Card	Question ID	Trigger	Status	Reason
				boundary distinction, or distractors use the same nearby vocabulary.
Token IDs	v02710-token-ids-q2	meaning	retained	Retained because the term is necessary for a fair mechanism or boundary distinction, or distractors use the same nearby vocabulary.
Embeddings	v02712-embeddings-q1	vector	retained	Retained because the term is necessary for a fair mechanism or boundary distinction, or distractors use the same nearby vocabulary.
Embeddings	v02712-embeddings-q2	vector	retained	Retained because the term is necessary for a fair mechanism or boundary distinction, or distractors use the same nearby vocabulary.
Tensors	v02712-tensors-q1	tensor	retained	Retained because the term is necessary for a fair mechanism or boundary distinction, or distractors use the same nearby vocabulary.
Tensors	v02712-tensors-q2	weight; activation	retained	Retained because the term is necessary for a fair mechanism or boundary distinction, or distractors use the same nearby vocabulary.
Attention	v02712-attention-q2	attention	retained	Retained because the term is necessary for a fair mechanism or boundary distinction, or distractors use the same nearby vocabulary.
Attention	v02712-attention-q3	attention	retained	Retained because the term is necessary for a fair mechanism or boundary distinction, or distractors use the same nearby vocabulary.
Layers	v02712-layers-q2	layer	retained	Retained because the term is necessary for a fair mechanism or boundary distinction, or distractors use the same nearby vocabulary.
Hidden States	v02712-hidden-states-q4	hidden states	retained	Retained because the term is necessary for a fair mechanism or boundary distinction, or distractors use the same nearby vocabulary.
Logits	v02712-logits-q2	logit	retained	Retained because the term is necessary for a fair mechanism or

Card	Question ID	Trigger	Status	Reason
				boundary distinction, or distractors use the same nearby vocabulary.
Logits	v02712-logits-q3	logits	retained	Retained because the term is necessary for a fair mechanism or boundary distinction, or distractors use the same nearby vocabulary.
Softmax	v02712-softmax-q2	probability	retained	Retained because the term is necessary for a fair mechanism or boundary distinction, or distractors use the same nearby vocabulary.
Softmax	v02712-softmax-q3	logits	retained	Retained because the term is necessary for a fair mechanism or boundary distinction, or distractors use the same nearby vocabulary.
Sampling	v02712-sampling-q3	sampling	changed	Correct answer or stem was revised to reduce term echo.
Sampling	v02712-sampling-q4	sampling	retained	Retained because the term is necessary for a fair mechanism or boundary distinction, or distractors use the same nearby vocabulary.
Context Window	v02712-context-window-q2	memory	retained	Retained because the term is necessary for a fair mechanism or boundary distinction, or distractors use the same nearby vocabulary.
Grounding	v02712-grounding-q3	citation	retained	Retained because the term is necessary for a fair mechanism or boundary distinction, or distractors use the same nearby vocabulary.
Grounding	v02712-grounding-q4	grounding	retained	Retained because the term is necessary for a fair mechanism or boundary distinction, or distractors use the same nearby vocabulary.
Hallucinations	v02712-hallucinations-q3	hallucination; lying	retained	Retained because the term is necessary for a fair mechanism or boundary distinction, or distractors use the same nearby vocabulary.
Diffusion vs Autoregression	v02712-diffusion-q1	diffusion	retained	Retained because the term is necessary for a fair mechanism or boundary distinction, or distractors use the same nearby vocabulary.

Card	Question ID	Trigger	Status	Reason
The Perfect Storm	v02712-perfect-storm-q2	incentives	retained	Retained because the term is necessary for a fair mechanism or boundary distinction, or distractors use the same nearby vocabulary.
Collective Intelligence, Extracted	v02712-collective-intelligence-q3	pretraining	retained	Retained because the term is necessary for a fair mechanism or boundary distinction, or distractors use the same nearby vocabulary.
Costs We Must Count	v02712-costs-we-must-count-q3	costs	retained	Retained because the term is necessary for a fair mechanism or boundary distinction, or distractors use the same nearby vocabulary.
Risk vs Myth	v02712-risk-myth-q2	tool	retained	Retained because the term is necessary for a fair mechanism or boundary distinction, or distractors use the same nearby vocabulary.
Risk vs Myth	v02712-risk-myth-q3	hallucination; lying	retained	Retained because the term is necessary for a fair mechanism or boundary distinction, or distractors use the same nearby vocabulary.
Risk vs Myth	v02712-risk-myth-q4	risk; myth	retained	Retained because the term is necessary for a fair mechanism or boundary distinction, or distractors use the same nearby vocabulary.
Benefits Worth Taking Seriously	v02712-benefits-worth-taking-seriously-q3	benefits	retained	Retained because the term is necessary for a fair mechanism or boundary distinction, or distractors use the same nearby vocabulary.
Effective Prompting from Model Literacy	v02712-effective-prompting-literacy-q3	citation	retained	Retained because the term is necessary for a fair mechanism or boundary distinction, or distractors use the same nearby vocabulary.
Model Literate Synthesis	v02712-model-literate-synthesis-q1	prompt	retained	Retained because the term is necessary for a fair mechanism or boundary distinction, or distractors use the same nearby vocabulary.

Live Stage Links

The lesson-header stage map now uses buttons with aria labels such as `Go to Stage 3: Workday` . Clicking a stage opens the first learning card in that stage and does not complete lessons or checkpoints.

Stage	Button label	Destination card	Destination position
1	Go to Stage 1: Before Morning	What Is an LLM?	Before Morning 1 / 39
2	Go to Stage 2: Morning Commute	Inference	Morning Commute 9 / 39
3	Go to Stage 3: Workday	Attention	Workday 16 / 39
4	Go to Stage 4: Decision Room	Logits	Decision Room 20 / 39
5	Go to Stage 5: The Day Repeats	Autoregression	The Day Repeats 23 / 39
6	Go to Stage 6: Twilight: The Wider Landscape	How AI Learns	Twilight: The Wider Landscape 28 / 39
7	Go to Stage 7: Midnight Ledger	Collective Intelligence, Extracted	Midnight Ledger 32 / 39
8	Go to Stage 8: New Dawn	Benefits Worth Taking Seriously	New Dawn 35 / 39

Visual Aid Audit Summary

Rendered screenshots were captured at 390px for all 39 Journey visual aids.

- Generated image assets: 4
- Coded SVG visuals: 33
- Coded HTML/CSS visuals: 2
- P1 future repairs: 6
- P2 watch/revise items: 7
- P3 keep/fixed items: 26

Top 10 Visuals Needing Future Repair

#	Visual	ID	Priority	Reason
1	Borrowed Flames	collective-intelligence-lantern	P1	Important provenance/labor idea is still abstract; future visual should make data, labor, and extraction relationships more concrete.
2	Benefit Tiers	benefits-tool-garden	P1	Benefit tiers need sharper connection to realistic use plus human review.
3	Cost Ledger	costs-invisible-factory	P1	Cost categories are important and can become crowded; future pass should make costs easier to scan.
4	Accountability Flow	human-centered-ai-garden	P1	Accountability flow should be made more operational and less metaphor-dependent.
5	Better-AI Control Panel	responsible-ai-forked-path	P1	Governance/control-panel idea should be clearer for institutional decision makers.
6	Full Chain Map	synthesis-map-compass-lantern	P1	Full-chain synthesis is the densest visual; needs simplification before badge-facing review.
7	Overfitting vs Generalization	overfitting-generalization	P2	Set-aside validation is explained, but future polish should make the held-back examples visually unmistakable at 320px.
8	Fine-Tuning Path	before-morning-finetuning-path	P2	Generated image is usable, but a future coded callout should contrast durable adaptation with prompt, RAG, and sampling more explicitly.
9	Text to Tokens	tokenization	P2	Recent token-chip repair is mostly readable; keep watching the final token/punctuation example at

#	Visual	ID	Priority	Reason
				320px.
10	Feature Vector	vectors	P2	Abstract feature dimensions are correct but could use a less dense future visual for nontechnical learners.

Visual Aids Fixed This Pass

- **Inference / Forward Pass:** tiny output label changed from `floor` to `token`.
- **Visual audit artifacts:** JSON, CSV, HTML, PDF, and screenshots created for all 39 visual aids.

Verification

- `npm run typecheck`: passed.
- `npm run build`: passed; existing Vite chunk-size warning remains.
- `npm run build:pages`: passed; existing Vite chunk-size warning remains.
- `npm run audit:answers`: passed.
- `npm run audit:checkpoints`: passed for v0.27.15 bank.
- `npm run audit:question-clues`: passed informational audit; 36 remaining term-echo candidates, 43 answer-length warnings, 0 vague-stem warnings.
- `npm run audit:learner-copy`: passed.

LocalStorage Behavior

No new localStorage keys were created. Stage links write the existing last-location and lesson-id keys through the existing app state hook. Progress, reflections, exercise progress, Play progress, Glossary Dojo progress, and choice-order seed keys are preserved; reset behavior is unchanged.
