

PROMPT LIFE · V0.27.15 · RESPONSE PACKET

Last Response With Screenshots

Wrapped on Jun 11, 2026, 9:31 PM. This PDF contains the previous Codex report and the QA screenshots that were included with it.

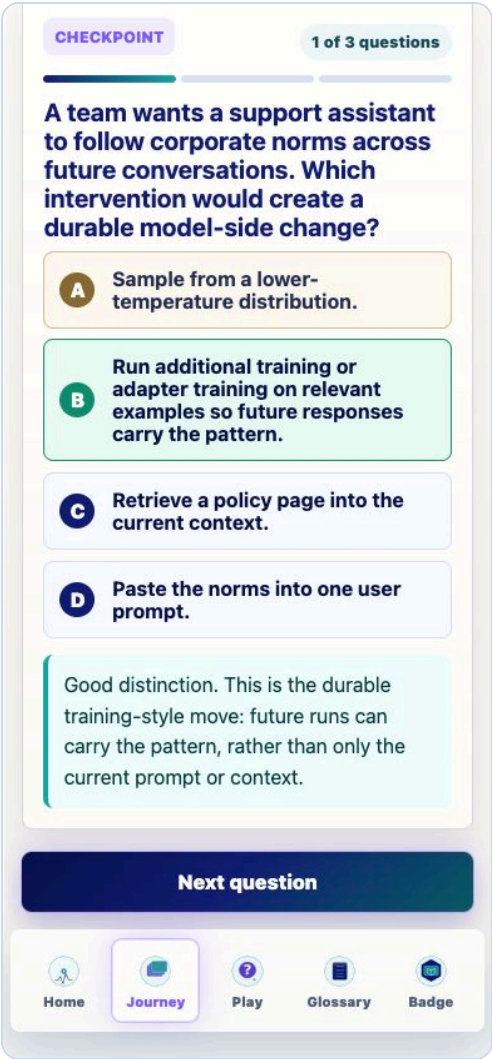

Previous Response

1	Summary	Repaired checkpoint answer-giveaway issues, made lesson-header stage links live, audited all 39 visual aids with screenshots, and bumped the app/package version to 0.27.15.
2	Fine-Tuning fixed	Yes.
3	New Fine-Tuning checkpoint	Stem: A team wants a support assistant to follow corporate norms across future conversations. Which intervention would create a durable model-side change? Choices: A. Sample from a lower-temperature distribution. B. Retrieve a policy page into the current context. C. Run additional training or adapter training on relevant examples so future responses carry the pattern. D. Paste the norms into one user prompt.
4	Answer-giveaway items found	38 candidate checkpoint questions reviewed.
5	Changed/retained	2 questions changed, 36 retained with rationale. Changed: Fine-Tuning q1 and Sampling q3.
6	Live stage links	Yes, the lesson-header stage map is now tappable and keyboard-accessible.
7	Stage destinations	Stage 1 -> What Is an LLM?; Stage 2 -> Inference; Stage 3 -> Attention; Stage 4 -> Logits; Stage 5 -> Autoregression; Stage 6 -> How AI Learns; Stage 7 -> Collective Intelligence, Extracted; Stage 8 -> Benefits Worth Taking Seriously.
8	Stage nav progress	No checkpoint or progress completion is awarded. It only updates the current tab/lesson using existing state.

9	Visual audit files	prompt-life-v0-27-15-visual-aid-audit.pdf, visual-aid-inventory-v0-27-15.json, and visual-aid-inventory-v0-27-15.csv.
10	Visual aid counts	39 total; 4 image assets, 33 coded SVG, 2 coded HTML/CSS; 6 P1, 7 P2, 26 P3.
11	Top visual repair candidates	Collective Intelligence, Benefits, Costs, Human-Centered AI, Responsible AI, Synthesis, Overfitting/Generalization, Fine-Tuning Path, Tokenization, Vectors.
12	Visual aids fixed	Inference visual tiny label changed from floor to token.
13	Learner-facing copy changes	Fine-Tuning checkpoint active bank plus legacy fallback, Sampling q3 correct answer, Inference tiny visual label, compact live stage labels in lesson headers.
14	Checkpoint data/model/logic changes	New v0.27.15 bank and runtime export; app now imports checkpointBankV02715; added audit:question-clues; no randomization or progress-rule change.
15	localStorage	No new keys. Preserved existing progress, lesson id, last location, reflections, exercise/play/dojo progress, prompt run progress, trace flags, learning tour, and choice-order seed.
16	Verification	typecheck, build, build:pages, audit:answers, audit:checkpoints, audit:question-clues, and audit:learner-copy all passed. Existing Vite chunk-size warning remains.
17	Mobile QA	320px and 390px Fine-Tuning checkpoint showed no horizontal overflow; bottom nav visible.
18	Desktop QA	1280px check showed no horizontal overflow.
19	Files changed	Source/app files, v0.27.15 checkpoint artifacts, visual-aid audit artifacts, QA screenshots, reports, scripts, package version, and review notes. Full list is in the report.
20	Reports created	prompt-life-v0-27-15-checkpoint-visual-nav-report.pdf and prompt-life-v0-27-15-visual-aid-audit.pdf. Note: I did not

push to GitHub in that turn because the prompt did not ask me to update main.
