

Glossary + Journey Path Clarity Report

Internal report generated 2026-06-05. This PDF wraps the response summary and screenshots for the v0.14 mobile-first glossary and Journey filtering pass.

What Changed

Glossary sorting

Added A-Z and Learning path sort modes, with A-Z as the default reference mode.

Learning metadata

Added first-introduced lesson metadata on learning-path cards and in the drawer.

Lesson links

Added Open lesson from the drawer, routing completed lessons to Review and incomplete lessons to Preview.

Journey filters

Added All, Essential, Deep, and Ethics filters without changing progress rules.

The pass keeps the curriculum stable while making the app easier to skim: glossary terms can now be found alphabetically or followed in learning order, and the Journey can be narrowed without treating all 38 cards as required.

Files Changed

- `src/main.tsx`
- `src/data/content.ts`
- `src/styles/global.css`
- `README.md`
- `docs/REVIEW_NOTES.md`
- `docs/curriculum/GLOSSARY_ORDERING_V0_14.md`
- `docs/curriculum/JOURNEY_PATH_FILTERS_V0_14.md`
- `docs/curriculum/V0_14_CHANGE_LOG.md`
- `docs/curriculum/prompt-life-v0-14-glossary-journey-report.html`
- `docs/curriculum/prompt-life-v0-14-glossary-journey-report.pdf`
- `docs/screenshots/v0-14-*.png`

How To Run Locally

```
cd ~/Desktop/promptlife
npm install
npm run dev
```

Open the local URL printed by Vite. For phone testing on the same Wi-Fi network, run `npm run dev -- --host 0.0.0.0` and open the Network URL Vite prints.

For the deployed build, open <https://kevinhegg.github.io/promptlife/?v=014> after the GitHub Pages run completes.

What Is Done

- The Glossary defaults to A-Z and can switch to Learning path.
- Search works in both sort modes and keeps the selected mode active.
- Learning path groups terms by Journey section and shows `Introduced in` metadata.
- The glossary drawer shows `First appears in` and an `Open lesson` action.
- Glossary lesson links preserve progress: completed cards open Review mode, future cards open Preview mode.
- Journey filters show All, Essential, Deep, and Ethics, with counts of 38, 27, 5, and 6 cards.
- Filtering does not alter completion, badge state, or the current open lesson.
- The visible app version is `v0.14.0`.

Verification

COMMANDS

- `npm install`: passed.
- `npm run typecheck`: passed.
- `npm run build`: passed with the existing Vite large-chunk warning.
- `npm run build:pages`: passed with the existing Vite large-chunk warning.

BROWSER QA

- 390px screenshots captured for Glossary A-Z, Learning path, token search, drawer metadata, Preview from glossary, Review from glossary, and Journey filters.
- 320, 390, and 430px overflow checks passed for Glossary A-Z, Learning path, token search, and Journey All/Essential/Deep/Ethics filters.

- Completed one lesson through the normal checkpoint flow, then verified the glossary drawer opens that lesson in Review mode.
- Verified a future glossary lesson opens in Preview mode without changing progress.
- Verified the Return to Journey control exists on Preview/Review lesson pages.

Next Three v0.2 Improvements

1. Add a source-review pass for Ethics cards so public-facing claims can move from careful draft language to cited teaching language.
2. Consider saving the learner's preferred Glossary sort only after observing whether resetting to A-Z feels annoying in testing.
3. Add a compact path overview on the Badge page so learners can see Essential, Deep, and Ethics progress separately.

Screenshots

DEFINITIONS PLUS RELATIONSHIPS

Glossary

Use each term with its neighbor. That is where the mental model gets stable.

Search terms

token, tensor, softmax...

A-Z

Learning path

Find terms alphabetically.

Accessibility

Designing tools and materials so more people can perceive, understand, navigate, and participate.

AI can support accessibility through drafting, summarization, translation, captioning, alternate formats, and assistive workflows when reviewed carefully.

Activation

A temporary numerical value or pattern produced inside the model during a forward pass.

Hidden states and many intermediate tensors are activation data during inference.

Glossary

Badge

Glossary default: A-Z sorting is active, with compact cards for fast lookup.

DEFINITIONS PLUS RELATIONSHIPS

Glossary

Use each term with its neighbor. That is where the mental model gets stable.

Search terms

token, tensor, softmax...

A-Z

Learning path

Learning path shows how the vocabulary builds from prompt to response.

BEFORE MORNING

LLM

A large language model is a learned system that turns current context into probabilities for the next token.

An LLM uses weights shaped by training, then uses inference to generate response tokens one at a time.

Introduced in: What Is an LLM?

Rationalism

A reason-first tradition that emphasizes explicit principles, rules, and logic.

BEFORE MORNING

LLM

A large language model is a learned system that turns current context into probabilities for the next token.

An LLM uses weights shaped by training, then uses inference to generate response tokens one at a time.

Introduced in: What Is an LLM?

Pretraining

The broad first stage of training that updates model weights by learning next-token

patterns from large datasets.

Glossary drawer: First appears in metadata and Open lesson action are visible.

Preview from glossary: future/incomplete lesson links do not change progress.

Review from glossary: completed lesson links open the completed-card review state.

MAIN PATH

Today in Prompt Life

Follow one prompt from before training through inference, generation, and model literacy.

PATH VIEW

Choose a path

All cards build model literacy. Essential is the shortest path. Deep adds mechanics. Ethics connects AI to human consequences.

Showing all 38 Journey cards.

GUIDED COMPARISONS

Run and compare

Use these when the map feels abstract: one guides a prompt through the model, the other compares how AI systems learn.

Journey filter: All shows all 38 cards.

Follow one prompt from before training through inference, generation, and model literacy.
