

Checkpoint Progress Label Pass

This small Journey polish pass adds a question-count indicator to every lesson checkpoint and changes the post-checkpoint action label from `Next lesson` to `Next question`.

What Changed

- Every checkpoint panel now receives a progress object and shows `x of N question(s)`.
- Single-question lessons show `1 of 1 question` at the top right of the checkpoint panel.
- The sticky action now says `Next question` after a correct checkpoint answer, while the final badge action remains unchanged.
- The app/package version is now `0.27.4`.

Verification

- `npm run typecheck`: passed.
- `npm run build`: passed with the existing Vite large-chunk warning.
- `npm run build:pages`: passed with the existing Vite large-chunk warning.
- `npm run audit:answers`: passed.
- Browser QA on Where LLMs Fit confirmed `1 of 1 question`, `Next question`, and no horizontal overflow.

Reveal what each branch means in the AI family tree.

CHECKPOINT

1 of 1 question

Which statement is most accurate?

- A** Diffusion models and LLMs work the same way.
- B** All AI systems are LLMs.
- C** Machine learning and AI mean exactly the same thing.
- D** An LLM is one kind of generative AI inside the broader AI family.

Insight unlocked. LLMs are one important branch, not the whole AI forest.

REFLECT

Teach it back in one sentence.

Example: Inference uses the model's weights but does not rewrite them.
