

Prompt Life v0.28.8 Learner Copy Boundary Audit

Generated 2026-06-15T03:13:25.076Z. This report verifies that prompt-planning, implementation, batch, asset, fallback, version, debug, and report-language terms do not appear in normal learner-facing app UI.

SUMMARY

Normal learner UI passed the leak check

The known Inference “Batch 1” leak was fixed, learner-visible version text was removed from Badge, and returning-learner Play wording now avoids version/legacy language. Rendered smoke checks for Home, Journey card 1, Inference, an Image 2 visual card, Play, Glossary, and Badge passed with no forbidden process-language matches.

KNOWN LEAK

Batch 1 Before / After

BEFORE	AFTER	STATUS
Batch 1 explained how weights are shaped before use. Inference is the live run that uses those weights without rewriting them.	Earlier learning cards explained how weights are shaped before use. Inference is the live run that uses those weights without rewriting them.	fixed

REPLACEMENTS

Every Replacement Made

ID	STATUS	BEFORE	AFTER	REASON
inference- batch-1-how-it- connects	fixed	Batch 1 explained how weights are shaped before use. Inference is the live run that uses those weights without rewriting them.	Earlier learning cards explained how weights are shaped before use. Inference is the live run that uses those weights without rewriting them.	Batch 1 was development-planning language in normal Journey copy.
prompt-run-v2- note	fixed	This v2 capstone keeps that progress while offering a shorter active trace.	This capstone keeps that progress while offering a shorter trace.	v2 was internal version language for returning learners.
costs-small- pilots- distractor	fixed	It proves small pilots need no review.	It proves small trials need no review.	Pilot was ambiguous with development/testing language; trial keeps the learner meaning.
badge- checkpoint- bank-copy	fixed	The Journey, checkpoint bank, and evidence model are being tested before any badge is issued.	The Journey, checkpoint questions, and evidence model are being tested before any badge is issued.	Checkpoint bank is internal assessment-language; checkpoint questions is learner-facing.
badge-full- bank-copy	fixed	Complete the 39-card Journey and demonstrate checkpoint mastery across the full bank.	Complete the 39-card Journey and demonstrate checkpoint mastery across the checkpoint questions.	Full bank is internal assessment-language; checkpoint questions is learner-facing.

Evidence Captures

VISUAL AID

What to picture

Prompt to Prediction

Score, choose, append, repeat

Current context enters the model, learned weights shape next-token probabilities, one token is generated, and the response grows token by token.

- **Context enters** The current prompt and response-so-far become the visible input for this run.
- **Weights shape probabilities** Learned weights, built earlier during training, shape next-token scores.
- **One token is generated** The model chooses one response token from the probability cloud.
- **Response grows** That token is appended, then the model runs again.

Key takeaway:

An LLM turns context into next-token probabilities.

HOW IT CONNECTS

One relationship

Earlier learning cards explained how weights are shaped before use. Inference is the live run that uses those weights without rewriting them.

Inference card: no learner-facing process-language leak found.

Journey card 1: no learner-facing process-language leak found.

VISUAL AID

What to picture

The Perfect Storm

Why LLMs arrived now

Data, compute, storage, methods, labor, and incentives converged into modern LLM capability.

- **Many inputs** Data, compute, storage, and methods each mattered.
- **Human systems** Labor, funding, products, and demand helped move capability into use.
- **Convergence** Modern LLMs came from conditions meeting, not one single breakthrough.

Key takeaway:

Modern LLMs came from a convergence, not a single spark.

Image 2 visual card: no learner-facing process-language leak found.

PLAY LAB

Play to learn

Short, calm challenges that make model mechanics visible.

Progress saved on this device. 0 of 5 practice challenges show saved completion or review progress.

Each challenge practices one model-literacy move.
