

Glossary Dojo Feedback Precision

This pass makes wrong-answer feedback identify which glossary term the selected wrong answer actually belongs to, while preserving Dojo mastery, Journey progress, badge criteria, games, dependencies, generated assets, and checkpoint randomization.

What Changed

- Each Dojo option now carries represented-term feedback metadata.
- Wrong feedback says: `That definition is for [selected term]`, then names the correct term or correct match.
- Correct feedback now begins with `Insight strengthened.`
- The feedback region and answer choices expose stable QA attributes.

Files Changed

- `src/features/glossary-dojo/types.ts`
- `src/features/glossary-dojo/engine.ts`
- `src/features/glossary-dojo/GlossaryDojoGame.tsx`
- `src/main.tsx`
- `docs/REVIEW_NOTES.md`
- `docs/play/GLOSSARY_DOJO_FEEDBACK_V0_19_3.md`
- `docs/play/screenshots/v0-19-3-glossary-dojo-feedback-qa.json`

QA Result

Programmatic browser QA passed at 390px and 320px. It checked wrong-answer feedback for `term_to_definition`, `definition_to_term`, `confusable_pair`, `relationship`, and `stage_location`, plus one correct-answer state. The trace reported zero failures.

Verification

- `npm run typecheck`: passed.
- `npm run build`: passed with the existing Vite large-chunk warning.
- `npm run build:pages`: passed with the existing Vite large-chunk warning.
- `npm run audit:answers`: passed.

Screenshots

Your choice

C

Training that nudges a model toward preferred responses and away from less-preferred ones.

Preference optimization

D

A decoding setting that changes how sharp or spread out next-token probabilities feel.

Temperature

Not quite. That definition is for Sampling. The correct match is Tokenizer. Tokenizer means The rules and vocabulary that split text into tokens and map those tokens to IDs.

Known Issues

Feedback uses the glossary short definition exactly as written, so some generated sentences can read like `RAG means RAG retrieves...`. That is a glossary wording cleanup opportunity, not a feedback attribution bug.
