

Glossary Dojo Shared Shell Report

Glossary Dojo now uses the shared Play Challenge Foundation shell, progress, feedback, completion, and action components while preserving its 12-question glossary learning loop.

1. Summary

Dojo keeps its quiz engine, glossary content, close distractors, repeat rounds, review rounds, and existing progress store. The UI now sits on the shared Play shell and writes attempt/completion summaries through the shared Play progress key.

- Wrapped start and question states with `PlayChallengeShell` and `PlayChallengeHeader`.
- Added shared `PlayStatusPill` and `PlayProgressRail` for round status and question progress.
- Replaced answer feedback with `PlayFeedbackPanel`.
- Replaced summary lead with `PlayCompletionPanel`.
- Updated visible feedback leads to `Good distinction.` and `This choice reveals a common mix-up.`
- Updated summary actions to `Try another round` and `Review missed terms`.
- Bumped the app version to `v0.26.3`.

2. Recommendations For The Next Pass

- Move Context Stack onto the same shared shell and completion-panel pattern.
- Add a compact debug-only Play progress viewer after the storage shape stabilizes.
- Build Probability Picker before replacing the Attention Match bridge.

3. Challenges And Risks

- The Dojo engine still owns detailed feedback text; the UI strips older lead phrases and adds the new calm lead.
- Dojo mastery remains in `promptlife.glossaryDojo.v1`; shared Play progress records attempt/completion summary only.
- The existing Vite large-chunk warning remains.

4. UI Cards, Screens, Scenes, And Routes Changed

Dojo Start

Shared shell, status pill, progress rail, feedback panel, and shared action row.

Dojo Question

Shared shell, question progress rail, status pill, and feedback panel.

Dojo Feedback

Visible feedback starts with calm distinction/mix-up language.

Dojo Summary

Completion panel shows `Round completed` or `Review suggested`.

Badge

QA checked shared Dojo progress in the Badge play challenge count.

Reset

QA confirmed reset clears shared Play and Dojo progress keys.

5. LocalStorage Keys

- Preserved/read/written: `promptlife.playChallenges.v1`
- Preserved/read/written: `promptlife.glossaryDojo.v1`
- Preserved/read for bridge compatibility: `promptlife:v1:gameInsights`
- Preserved/read for bridge compatibility: `pl.gameInsights`
- Preserved/read for bridge compatibility: `promptlife:v1:promptRunProgress`
- Preserved/read for bridge compatibility: `pl.promptRunProgress`
- Preserved/read for bridge compatibility: `promptlife:v1:traceComplete`
- Preserved/read for bridge compatibility: `pl.traceComplete`
- Preserved/read for bridge compatibility: `promptlife:v1:learningTourComplete`
- Preserved/read for bridge compatibility: `pl.learningTourComplete`
- Preserved: Journey, exercise, reflection, choice-order, and Prompt Run keys.

6. Verification

- `npm run typecheck`: passed.
- `npm run build`: passed with the existing Vite large-chunk warning.
- `npm run build:pages`: passed with the existing Vite large-chunk warning.
- `npm run audit:answers`: passed.
- 390px QA: Dojo opened, started, advanced, showed common-mix-up and good-distinction feedback, completed, wrote shared Play progress, loaded Badge, and reset cleared shared Play/Dojo keys.
- 320px QA: question screen showed `Question 1 of 12`, four answer choices, and no horizontal overflow.

7. Files Changed

- `src/features/play/PlayChallengeComponents.tsx`
- `src/features/glossary-dojo/GlossaryDojoGame.tsx`
- `src/features/glossary-dojo/GlossaryDojoSummary.tsx`
- `src/main.tsx`

- `src/styles/global.css`
- `docs/play/PLAY_FOUNDATION_LOG.md`
- `docs/REVIEW_NOTES.md`
