

PROMPT LIFE VISUAL REPAIR

v0.25.5 Prompt vs Response Visual Clarity

What Changed

- Increased the coded SVG height for the Prompt vs Response visual.
- Removed numbered overlay bubbles that crowded the content.
- Reduced long in-diagram text and split the visual into four clean lanes: Given Prompt, Response So Far, Next, and Updated Context.
- Kept longer explanations in HTML callouts below the SVG.
- Bumped the visible app version to **v0.25.5**.

Verification

- `npm run typecheck` : passed.
- `npm run build` : passed with the existing Vite large-chunk warning.
- In-app browser was refreshed to `?v=0255-prompt-response-clarity` ; old prompt-response formula text was absent and no horizontal overflow was detected.

not change.

VISUAL AID

What to picture

1 GIVEN PROMPT
provided before generation
Describe two pets conflict

2 RESPONSE SO FAR
generated tokens
A jealous dog

3 NEXT
chased

4 UPDATED CONTEXT
what the next run sees
prompt A jealous dog chased

Prompt vs Response

Given context versus generated tokens

Prompt tokens are given to the model; response tokens are generated one at a time and appended to the next context.

1 Given prompt

The request "Describe two pets in conflict" is already provided input.

2 Generated response

The response-so-far "A jealous dog" was generated by the model.

3 Next token

The newly selected token "chased" is appended to the response.
