

Prompt Life v0.25.8 Tokenization Crisp Diagram Repair

Repaired the Text to Tokens visual so token chips and uneven split examples stay readable on mobile.

Build, Pages build, typecheck, and answer audit passed.

What Changed

- Replaced the crowded Tokenization SVG layout with a coded HTML/CSS diagram.
- Removed overlapping numbered annotation marks from inside the visual.
- Reworked the diagram into Source text, Token stream, and Uneven examples sections.
- Split the confusing final combined pill into readable rows for `startled` and `floor.`.
- Bumped the visible app version to `v0.25.8`.

Files Changed

- `src/components/VisualAids.tsx`
- `src/styles/global.css`
- `src/main.tsx`
- `docs/REVIEW_NOTES.md`
- `docs/reports/screenshots/v0-25-8-tokenization-crisp-390.png`
- `docs/reports/screenshots/v0-25-8-tokenization-crisp-320.png`
- `docs/reports/screenshots/v0-25-8-tokenization-crisp-screenshots.json`

Verification

- `npm run typecheck` : passed.
- `npm run build` : passed with the existing Vite large-chunk warning.
- `npm run build:pages` : passed with the existing Vite large-chunk warning.
- `npm run audit:answers` : passed.
- Browser QA: token chips wrap inside their cards at 390px and 320px; no SVG fallback; no horizontal overflow.

TOKENIZATION

Text to Tokens

Lesson: Tokenization

Pattern: token

Variant: paper-diagram

SOURCE TEXT

human-readable sentence

A jealous dog chased a startled cat...

TOKEN STREAM

model-readable chunks

A

jealous

dog

chased

a

startled

cat

across

the

kitchen

floor

.

UNEVEN EXAMPLES

tokens are not always words

startled

becomes

start

led

floor.

becomes

floor

.

Text to Tokens

Uneven chunks, punctuation included

Text is split into model-readable chunks before token IDs and embedding lookup.

1

Simplified split

A | jealous | dog | chased | a | startled | cat | across | the | kitchen | floor | .

2

Uneven chunks

Some tokenizers may split words or punctuation, such as start | led or floor | .

3

Teaching note

This app uses a simplified

Known Issues

No new known issue from this pass. The production build still reports the existing Vite large-chunk warning.
