

PROMPT LIFE V0.26.7

Play Landing Polish Report

The Play landing page now presents one coherent set of calm practice challenges, sorted by Journey readiness and annotated with compact stage mapping plus saved-practice stats.

What Changed

Landing Copy

Header now reads `PLAY LAB`, `Play to learn`, and `Short, calm challenges that make model mechanics visible`.

Unified Slate

The landing page uses one `Play challenges` list. No Featured Activity section or developer-facing foundation/slate labels remain in learner-visible source.

Stage Mapping

Each challenge card now shows the recommended Journey point, compact stage chips, related learning cards, action, time, status, and calm saved-practice stats.

Badge Copy

Badge copy now frames Play as practice history while preserving one badge: **Prompt Life: Model Literate**.

Visible Challenge Order

1. Glossary Dojo: Anytime / Glossary.
2. Attention Match: after Stage 3, Workday.
3. Probability Picker: after Stage 4, Decision Room, coming soon.
4. Context Stack: after Stage 5, The Day Repeats.
5. Prompt Run: after Stage 5, capstone across Stages 2-5.

Copy Changes

- `Play to understand` -> `Play to learn`.
- `ZenTron Paper Lab` -> `PLAY LAB`.
- `Practice challenges` heading -> `Play challenges`.
- `Previewing this card` -> `Previewing this learning card`.
- `synthesis card` -> `synthesis learning card`.
- `Lesson Cards` -> `Learning Cards`.

LocalStorage

- Read/displayed: `promptlife.playChallenges.v1`
- Preserved legacy Context Stack keys: `promptlife:v1:gameInsights`, `pl.gameInsights`
- Preserved Prompt Run bridge keys: `promptlife:v1:promptRunProgress`, `pl.promptRunProgress`
- Preserved Prompt Run completion keys: `promptlife:v1:traceComplete`, `pl.traceComplete`
- Preserved learning-tour bridge keys: `promptlife:v1:learningTourComplete`, `pl.learningTourComplete`
- Preserved independent Dojo key: `promptlife.glossaryDojo.v1`
- No storage migration, reset behavior, Journey progress, or badge logic change was added.

Verification

Commands

- `npm run typecheck`: passed.
- `npm run build`: passed with existing Vite large-chunk warning.
- `npm run build:pages`: passed with existing Vite large-chunk warning.
- `npm run audit:answers`: passed.

Mobile QA

390px and 320px checks passed: no horizontal overflow, title fit, chips and stat rows wrapped cleanly, bottom nav remained usable, and vertical scrolling was obvious.

Route QA

Glossary Dojo, Attention Match, Context Stack, and Prompt Run opened from the Play landing page. Probability Picker stayed disabled as coming soon. Token Pipeline Relay and How AI Learns were not visible as normal Play cards. Badge loaded with `v0.26.7`.

Known Issues

Probability Picker remains coming soon. Attention Match still uses the compatibility interaction underneath. The existing Vite large-chunk warning remains.
