

Play Landing Microcopy Report

This pass removes cryptic practice-move chips from the top Play panel and puts clear practice moves directly on each challenge card.

What Changed

Top Panel

Removed unlabeled `name`, `place`, `choose`, `connect`, and `trace` chips. Added: `Each challenge practices one model-literacy move.`

Practice Moves

Each Play challenge card now includes a clear `Practice move:` line, such as `Name concepts` or `Choose likely next tokens`.

Stats

Active Glossary Dojo progress now reads `Current: N correct` and `Last played: Today`. Started but unscored challenges read `Current: Started`.

Heading Area

Removed the decorative `Practice set` pill. The heading is simply `Play challenges` with the helper line `Suggested order follows the Journey`.

Practice Move Mapping

- Glossary Dojo: `Name concepts`.
- Attention Match: `Connect token clues`.
- Probability Picker: `Choose likely next tokens`.
- Context Stack: `Place context cards`.
- Prompt Run: `Trace the loop`.

LocalStorage

- Read/displayed: `promptlife.playChallenges.v1`
- Preserved legacy Context Stack keys: `promptlife:v1:gameInsights`, `pl.gameInsights`
- Preserved Prompt Run bridge keys: `promptlife:v1:promptRunProgress`, `pl.promptRunProgress`
- Preserved Prompt Run completion keys: `promptlife:v1:traceComplete`, `pl.traceComplete`
- Preserved learning-tour bridge keys: `promptlife:v1:learningTourComplete`, `pl.learningTourComplete`
- Preserved independent Dojo key: `promptlife.glossaryDojo.v1`
- Reset QA verified `promptlife.playChallenges.v1` and `promptlife.glossaryDojo.v1` clear after confirmation.

- No storage migration, new storage key, Journey progress change, or badge logic change was added.

Verification

Commands

- `npm run typecheck`: passed.
- `npm run build`: passed with existing Vite large-chunk warning.
- `npm run build:pages`: passed with existing Vite large-chunk warning.
- `npm run audit:answers`: passed.

Mobile QA

At 390px and 320px, there was no horizontal overflow. The top panel was shorter, challenge card stats wrapped cleanly, vertical scrolling stayed obvious, and the bottom nav remained usable.

Route QA

Glossary Dojo, Attention Match, Context Stack, and Prompt Run opened from Play. Probability Picker remained coming soon. Badge loaded with `v0.26.8`. Reset progress cleared shared Play and Dojo keys in an isolated browser profile after accepting the confirmation.

Known Issues

Probability Picker remains coming soon. Attention Match still uses the compatibility interaction underneath. The existing Vite large-chunk warning remains.
