

Prompt Life v0.26.5 Prompt Response Panel Padding

Trimmed the vertical padding inside the four rectangular Prompt vs Response visual panels.

Build, Pages build, typecheck, and answer audit passed.

What Changed

- Reduced the four panel cards' top and bottom padding by about half.
- Kept the horizontal padding, four-row structure, labels, and lesson content unchanged.
- Bumped the visible app version to `v0.26.5`.
- Updated the README cache-busting example to `?v=0265`.

Files Changed

- `src/styles/global.css`
- `src/main.tsx`
- `package.json`
- `package-lock.json`
- `README.md`
- `docs/REVIEW_NOTES.md`
- `docs/reports/screenshots/v0-26-5-prompt-response-padding-390.png`
- `docs/reports/screenshots/v0-26-5-prompt-response-padding-320.png`

Verification

- `npm run typecheck` : passed.
- `npm run build` : passed with the existing Vite large-chunk warning.
- `npm run build:pages` : passed with the existing Vite large-chunk warning.
- `npm run audit:answers` : passed.
- Browser QA: Prompt vs Response visual checked at 390px and 320px.

Screenshots

Prompt vs Response

Given context versus generated tokens

Prompt tokens are given to the model; response tokens are generated one at a time and appended to the next context.

- 1 Given prompt** The request "Describe two pets in conflict" is already provided input.
- 2 Generated response** The response-so-far "A jealous dog" was generated by the model.
- 3 Next token** The newly selected token "chased" is appended to the response.
- 4 Updated context** The next run sees prompt plus response so far plus the new token.

Key takeaway:

Prompt is given; response tokens are generated and appended.

Prompt vs Response

Given context versus generated tokens

Prompt tokens are given to the model; response tokens are generated one at a time and appended to the next context.

- 1 Given prompt** The request "Describe two pets in conflict" is already provided input.
- 2 Generated response** The response-so-far "A jealous dog" was generated by the model.
- 3 Next token** The newly selected token "chased" is appended to the response.
- 4 Updated context** The next run sees prompt plus response so far plus the new token.

320px review route capture

No new known issue from this pass. The production build still reports the existing Vite large-chunk warning.
