

Reflect Before Checkpoint

This pass moves reflection before the checkpoint and restores single-question progression language to `Next learning card`.

What Changed

- Reflect now appears before Checkpoint on lesson cards.
- Single-question checkpoints keep `1 of 1 question` but no longer use `Next question` after the answer.
- Correct single-question checkpoint state now shows `Next learning card`.
- Multi-question checkpoints still use `Next question` when another checkpoint question remains.
- The app/package version is now `0.27.5`.

Verification

- `npm run typecheck`: passed.
- `npm run build`: passed with the existing Vite large-chunk warning.
- `npm run build:pages`: passed with the existing Vite large-chunk warning.
- `npm run audit:answers`: passed.
- Browser QA confirmed Reflect before Checkpoint, `1 of 1 question`, `Next learning card`, and no horizontal overflow.

Reveal what each branch means in the AI family tree.

REFLECT

Teach it back in one sentence.

Example: Inference uses the model's weights but does not rewrite them.

CHECKPOINT

1 of 1 question

Which statement is most accurate?

- A** Diffusion models and LLMs work the same way.
- B** Machine learning and AI mean exactly the same thing.
- C** An LLM is one kind of generative AI inside the broader AI family.
- D** All AI systems are LLMs.

Insight unlocked. LLMs are one important branch, not the whole AI forest.
