

PROMPT LIFE V0.11

Wider AI Literacy Planning Report

A curriculum expansion plan for origins, extracted collective intelligence, benefits, costs, human-centered AI, responsible choices, effective prompting, and final synthesis.

Planning only**No app cards implemented****No generated PNG assets****Internal review artifact**

What Changed

- Created docs/curriculum/WIDER_AI_LITERACY_EXPANSION_V0_11.md.
- Created docs/curriculum/WIDER_AI_SOURCE_NEEDS_V0_11.md.
- Created docs/design/GENERATED_VISUAL_ASSET_PLAN_V0_11.md.
- Updated docs/REVIEW_NOTES.md with v0.11 results.
- Kept this as a documentation-only planning pass.

Proposed Cards

Card	Purpose	Path label
The Perfect Storm	Why LLMs arrived now through data, compute, algorithms, labor, and incentives.	Essential
Collective Intelligence, Extracted	No creators, no model; human expression powers capability.	Ethics
Benefits Worth Taking Seriously	Separate demonstrated help from plausible support and speculative hype.	Essential
Costs We Must Count	Count physical, social, cultural, and ethical costs honestly.	Ethics
Human-Centered AI	Judge tools by dignity, learning, responsibility, relationships, and common good.	Ethics
Better AI Is a Choice	Design, policy, governance, and incentives shape outcomes.	Deep
Effective Prompting from Model Literacy	Prompting shapes context, not weights.	Essential
Model Literate Synthesis	Understand the machine, then decide how to use it.	Essential

Proposed Visual Assets

- perfect-storm
- collective-intelligence-lantern
- benefits-tool-garden
- costs-invisible-factory
- human-centered-ai-garden
- responsible-ai-forked-path

All generated images are planned as textless conceptual assets. Instructional labels, callouts, and captions remain HTML/SVG controlled by the app.

Source Needs

The source-needs document uses placeholders rather than invented statistics. Review is required for environmental footprint, energy demand, water use, data provenance, copyright, labor disruption, deskilling, education impacts, AI benefits, human-centered AI, Vatican/Catholic sources, and secular governance frameworks.

Verification

- `npm install`: passed, 0 vulnerabilities.
- `npm run typecheck`: passed before documentation edits.
- `npm run build`: passed before documentation edits.
- Final verification will be rerun after this report is generated.
- No Journey cards, games, generated PNG app assets, heavy 3D libraries, or learner-facing PDF features were added.

Next Recommended Implementation Prompt

Implement the v0.11 Wider AI Literacy cards in app data as a draft Journey expansion after RAG/Grounding/Hallucinations and before Risk vs Myth. Do not add games. Use existing VisualAidCard patterns first and wait for explicit approval before generating or committing image assets.

SCREENSHOTS

Current App Context

No new UI pages were implemented in this planning pass. These existing v0.10 screenshots provide visual context for the future implementation.

PROMPT LIFE V0.10.0

ZenTron Origami

Internal visual identity playground for the v0.10 calming futuristic learning garden.

1. COLOR SWATCHES

Rice paper, mist, ink, and glow

Rice paper

RAG-RETRIEVAL

Open-Book Retrieval

Lesson: RAG and Retrieval

Pattern: rag

Variant: retrieval-shelf

Open-Book Retrieval

Retrieval plus context, not training

Retrieved notes enter the context before response tokens are generated.

- 1 **Ask** The user prompt starts the run.
- 2 **Retrieve** A search system finds relevant outside material.
- 3 **Add to context** Retrieved notes become temporary context tokens.
- 4 **Generate** The model still generates response tokens one at a time.
- 5 **Weights stay fixed** RAG does not normally update model weights.

Key takeaway:

RAG is retrieval plus context, not training.

LEARNING OBJECTIVE

Show that RAG retrieves outside information and places it into context; it does not train the model.

ACCESSIBLE DESCRIPTION

The RAG diagram moves from Prompt to Retriever to Notes, then into a Context tray and Generated response, with a separate fixed-

weights note.

MOBILE PREVIEW

Review at 320px, 390px, and 430px; diagram

Labels must stay inside the canvas

Existing RAG pilot visual; future Wider AI visuals should keep text in HTML/SVG callouts.
