

PROMPT LIFE REPORT · V0.19.2 · JUNE 6, 2026

Play Card Time Layout

The Play page now keeps each card's time estimate on one compact line, such as `Time: 3 min`, saving vertical space on mobile without changing the game content.

What changed

- Bumped the visible app version to `0.19.2`.
- Updated the Play card time metadata markup so the label and value stay together.
- Added a narrow CSS override for the time row only; Action and Teaches can still wrap naturally.
- Left games, progress, badge logic, checkpoint randomization, dependencies, and assets unchanged.

Verification

- `npm run typecheck` : passed.
- `npm run build` : passed with the existing Vite large-chunk warning.
- `npm run build:pages` : passed with the existing Vite large-chunk warning.
- `npm run audit:answers` : passed.
- Layout QA at 390px and 320px confirmed six single-line time rows, each measuring 18px tall.
