

Prompt Life Storage and Reset Report

Generated by Codex on May 31, 2026. Scope: previous storage/reset and prompt-vs-response implementation summary with screenshots.

Status	Complete. TypeScript and production build passed.
App	Prompt Life, mobile-first Vite + React app.
Primary artifact	Scoped localStorage reset controls plus storage documentation.

Files Changed

- src/main.tsx
- src/data/content.ts
- src/components/ConceptAnimations.tsx
- src/styles/global.css
- README.md
- docs/STORAGE_AND_RESET.md
- docs/REVIEW_NOTES.md
- docs/screenshots/v0-4-prompt-response-demo-mobile.png
- docs/screenshots/v0-4-reset-debug-mobile.png

What Is Done

- Added the Prompt vs Response teaching box and the dog/cat Prompt or Response? demo.
- Added glossary terms for prompt, response, input context, forward pass, decoding step, completion, model output, and related token concepts.
- Updated lessons so training, fine-tuning, inference, prompt processing, response generation, and retrieved/context information are separated more clearly.
- Added prompt/response/context token styling with non-color labels.
- Added Badge-screen Reset progress plus ?debug=1 progress tools.
- Scoped localStorage clearing to Prompt Life keys only.
- Documented storage/reset behavior.

Run Locally

```
cd /Users/kevinhegg/Desktop/promptlife
npm install
npm run dev
```

For phone testing on the same Wi-Fi:

```
npm run dev -- --host 0.0.0.0
```

Verification

- npm run typecheck passed.
- npm run build passed.
- 390px mobile QA covered the prompt/response demo and reset/debug controls.
- Reset confirmation and scoped key clearing were verified in a local browser run.

Next Three v0.2 Improvements

- Add automated tests for storage migration and reset behavior.
- Add an accessibility smoke test with Playwright or axe.
- Add a glossary relationship graph connecting prompt, response, context, decoding, and training terms.

Screenshots

Mobile-width screenshots from the storage/reset and prompt-vs-response pass.
