

PROMPT LIFE V0.23.4 REPAIR PASS · VISIBLE APP V0.23.5 · 2026-06-07

Perfect Storm Visual Layout Repair

Repaired the coded Storm Front visual so the convergence idea is clear on mobile without label collisions.

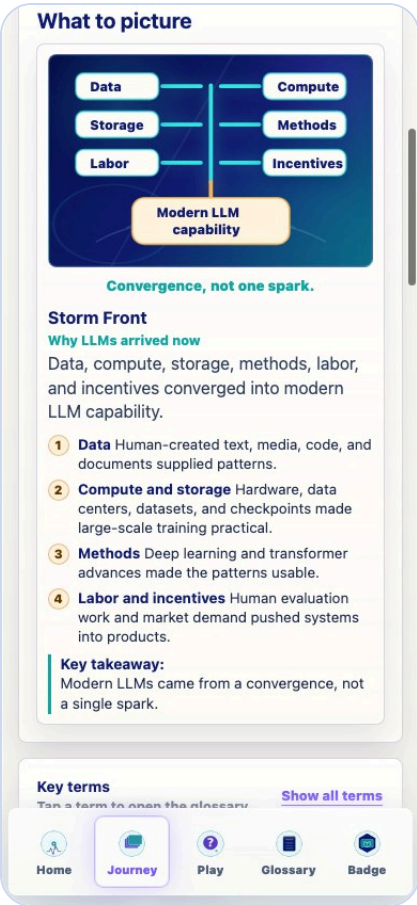

What Changed

- Replaced the cramped radial SVG with a stacked two-column convergence layout.
- Kept short SVG labels: Data, Compute, Storage, Methods, Labor, Incentives, and Modern LLM capability.
- Moved `Convergence, not one spark.` into HTML below the diagram.
- Preserved the existing non-competitive tap-to-light ingredient interaction.

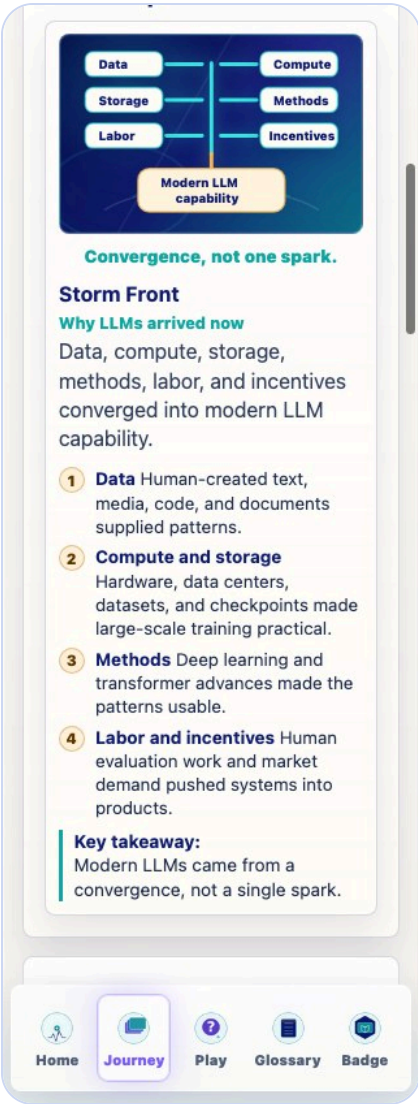

Verification

- `npm run typecheck` : passed.
- `npm run build` : passed with the existing large-chunk warning.
- `npm run build:pages` : passed with the existing large-chunk warning.
- `npm run audit:answers` : passed; Perfect Storm checkpoint remains randomized.
- 390px and 320px QA: no SVG text overlaps, no horizontal overflow, and the old in-SVG convergence label is gone.
- Interaction QA: all six ingredient buttons can be active and remain above the bottom nav.

Known Issue

The existing Vite large-chunk warning remains.
