

Prompt Run pass

Built the interactive Play spine for Prompt Life: Prompt Run now guides one prompt through the model with actions, hints, feedback, reveal, progress, and a final synthesis challenge. This keeps the tone warm and noncompetitive while making the mechanics less mysterious.

How to run locally

- `cd /Users/kevinhegg/Desktop/promptlife`
- `npm install`
- `npm run dev`
- Open `http://localhost:5173/` . For debug tools, use `http://localhost:5173/?debug=1` .

What is done

- Play now has a featured Prompt Run card, side challenge cards, and the How AI Learns tour card with action, concept, time, and completion state.
- Prompt Run replaces the old Trace One Prompt lecture with 12 interactive steps plus a final ordering challenge.
- Each Prompt Run step shows goal, do this, try area, feedback, why this matters, hints, and Show me.
- Progress is stored under `promptlife:v1:promptRunProgress` and reset clears it.
- Context Stack, Attention Weave, and Token Pipeline Relay now have clearer challenge targets and specific feedback.
- Badge progress now includes Prompt Run as a major milestone.
- Mobile bottom padding and feedback scrolling were improved for the fixed nav.

Verification

- `npm install` : passed
- `npm run typecheck` : passed
- `npm run build` : passed
- `npm run build:pages` : passed
- 390px screenshot QA completed.
- Reset QA completed: Prompt Run and lesson progress reset; unrelated localStorage remained.
- Reveal QA completed: Show me unlocks Continue and records the step as revealed.

Next three v0.6 improvements

- Add automated tests for Prompt Run progression, reveal, and reset.
- Add Watch and Challenge modes after classroom review of Practice mode.
- Add richer visual feedback for the final ordering challenge while preserving keyboard controls.
